PROFESSIONAL SUMMARY

Results-driven Data Analyst with 6+ years of experience developing Power BI solutions, building data pipelines, and automating business processes across retail, banking, and real estate. Proven track record of delivering measurable business impact — including \$100K–\$200K+ in revenue growth and \$100K+ in cost reductions — through Python, SQL, and the Microsoft Data Stack (Power BI, Fabric, Power Automate). Adept at translating complex datasets into executive dashboards and strategic recommendations that drive operational efficiency and data-driven decision-making.

TECHNICAL SKILLS

BI & Visualization: Power BI (Semantic Models, DAX, Star/Snowflake Schema), Advanced Excel (PivotTables, Power Query, Power Pivot, XLOOKUP), KPI Development, Financial Modeling

Programming & Query: Python (Pandas, NumPy, Selenium), SQL, R, VBA, Office Scripts, JavaScript

Automation & Workflow: Power Automate, Power Platform, Adobe Acrobat Integration, ETL Pipelines

Data Engineering: Microsoft Fabric, Azure, dbt, Snowflake, Data Modeling, EDA, UAT Testing, Data Normalization

Security & Administration: Microsoft 365 Admin (SharePoint, Entra ID, Intune, MFA, Conditional Access), Fraud Detection, Regulatory Compliance

CERTIFICATIONS

Microsoft Fabric Analytics Engineer Associate (DP-600) — Microsoft (Valid through October 2026)

Microsoft Power BI Data Analyst Associate (PL-300) — Microsoft (Valid through February 2027)

Microsoft Azure Fundamentals (AZ-900) — Microsoft

CompTIA Security+ — CompTIA (Valid through February 2029)

PROFESSIONAL EXPERIENCE

Data & Operations Manager

Feb 2025 – Jan 2026

Property Tax Advisors — Dover, NH

- Developed Python web scraping system to extract commercial/industrial property data from municipal tax records, building a \$1B+ prospecting dataset of 1,500+ high-value properties (\$3M+ valuations) with owner information, assessments, and full value calculations.
- Engineered end-to-end business process automation using Power Automate, Outlook, and Excel — eliminating manual management across the full property tax appeal lifecycle including filing, client communications, tracking, hearing coordination, invoicing, and final resolution.
- Served as sole Microsoft 365 Administrator, configuring Entra ID (MFA, conditional access), Intune, SharePoint, and security groups while auditing licenses and SaaS subscriptions to eliminate redundant tools and reduce costs.
- Decommissioned legacy network and hardware, deploying a replacement private network, RAID 1 NAS server, and new workstations saving \$20K+ over third-party managed service costs.
- Drove \$100K–\$200K+ in additional annual client revenue by expanding abatement filings from ~80 to 150+ applications per cycle directly attributed to the prospecting dataset.

Data Analyst — Retail Operations (Contract)

Nov 2024 – Feb 2025

Lovesac — Stamford, CT

- Fully automated reporting pipeline using Power Automate, Office Scripts, and Power Platform — eliminating 5+ hours of manual processing weekly and reducing report generation time for company-wide distribution.
- Diagnosed and flagged network latency issues caused by 30+ reports simultaneously accessing data every Monday, recommending load balancing solutions and more efficient, segmented Power BI data models to improve performance and scalability.
- Supported Microsoft Fabric migration from legacy SQL Server, conducting UAT to validate data accuracy and consistency across financial and operational datasets — identifying and resolving discrepancies to ensure zero data loss during transition.
- Used a custom Python script to analyze 20,000+ customer records, classifying and frequency-ranking the top 5 purchase barriers to deliver actionable insights and data-driven recommendations to improve sales conversion rates.

Data Analyst (Project Consultant)

Jun 2024

Nafshi Inc. — St Kilda East, Australia

- Designed analytical framework and ETL specifications for mental health program evaluation, defining KPIs and baseline metrics to enable longitudinal tracking of patient outcomes across multiple community service programs.
- Directed staff on data collection protocols, implemented advanced normalization techniques, and advised on EDA planning and data visualization approaches to ensure data quality and reliability for healthcare analytics reporting.

Independent Technology Consultant & Coach

Jun 2022 – Present

Self-Employed — Portsmouth, NH

- Diagnosed and resolved critical server access failure caused by accidental security group deletion — performing an administrative restore, reconnecting all workstations, and resolving conflict errors to restore company-wide resource access.
- Provide freelance Microsoft 365 consulting including SharePoint configuration, IT infrastructure setup, server administration, and systems optimization for small business clients.
- Continuously develop technical expertise through certification study (PL-300, DP-600, Security+, AZ-900) and hands-on project work in data analytics, dbt, Snowflake, and Microsoft Fabric.

Sr. Customer Analyst — Retail Operations

Dec 2019 – May 2022

Bangor Savings Bank — Portsmouth, NH

- Served as Security Champion for an 11-member team, delivering training on phishing prevention, MFA adoption, data encryption standards, and Business Continuity Planning protocols; maintaining 100% compliance during regulatory audits.
- Developed Excel-based fraud detection workflows analyzing transactional patterns and voice biometrics data, flagging high-risk accounts and enhancing customer protection protocols.
- Tracked and analyzed customer lifecycle metrics and branch performance KPIs using Excel and Power Query, delivering weekly executive dashboards that informed strategic decisions on branch operations.
- Reduced annual operational costs by \$100K through data-driven analysis of branch traffic patterns and service utilization, recommending optimal staffing models and branch hours.

Hospitality Specialist

Jan 2016 – Dec 2019

Wentworth by The Sea — New Castle, NH

- Consistently exceeded sales targets achieving \$3K–\$5K in daily revenue while coaching team members to a 90% staff retention rate.

Market Research Analyst

Oct 2012 – Dec 2014

MicroArts — Greenland, NH

- Applied statistical analysis to identify footwear market trends, informing brand and product design strategy; attended the Brazil Shoe Expo as on-site translator, evaluating manufacturing partners and negotiating production costs.

PROJECTS

- **Subscription Churn Analysis** — Python deep-dive on 7,043 customer records with segmentation by contract type, tenure, and payment method. Includes interactive HTML dashboard with live filtering. (github.com/SavitaOkhuysen/subscription-churn-analysis)
- **SaaS Subscription Analytics Pipeline** — Full dbt project with staging/mart architecture on Snowflake. 13 data quality tests, auto-generated docs, and models for MRR, churn, retention, and acquisition metrics. (github.com/SavitaOkhuysen/saas-subscription-analytics)
- **A/B Test Analysis** — Statistical analysis of a product experiment with hypothesis testing, power analysis, confidence intervals, and business recommendation framework. (github.com/SavitaOkhuysen/ab-test-analysis)
- **Marketing Attribution Modeling** — Multi-touch attribution comparing first-touch, last-touch, linear, and time-decay models to optimize marketing spend allocation across channels. (github.com/SavitaOkhuysen/marketing-attribution)

EDUCATION

University of New Hampshire — B.S. Biochemistry, Molecular and Cellular Biology

Great Bay Community College — A.S. Biotechnology
